The initiative of Darbi for seventh time gathered education from all over the world on 24 – 25 October 2009 in Sofia and on 27.10.2009 in Varna.

The main aim of our education fairs is to be as useful as we can to every of the visitors, who have decided to continue is education abroad. Our experience is showing us that the personal meetings with our consultants are very important for the future choice and career development of the young people.

Our efforts were directed to the following points:

- **To assist in the future career choice**

- **To assist for the language development and certificate preparation**

- **To assist in the process of the documents preparation**

- **To help in the psychological adjustment prior to departure abroad**

- **providing financial support to families by directing them to the scholarship program;**

- **work with our young principals starting from early language training through the vocational orientation, development of individual skills in sport, art, literature, development of attitudes such as resistance of attention, concentration, focus, a willingness to overcome difficulties for creativity and entrepreneurship.**

During the European fair "Open doors fair for education abroad 2009" we had gathered representatives from many foreign institutions to help with a personal meeting to the visitors of the event and to explain in details the programmes they offer.
